# Floor Mat Placement Guide

Purchasing a matting system is a long-term, cost-effective solution for your facility's everyday needs. This placement guide will help you decide which mats will be the best fit for your facility.

- **Scraper Mat** – Used outside facility entrances to stop mud and large particles from entering the building.
- **Scraper/Wiper Mat** – Placed inside the entrance to provide scraping and wiping action to further remove dirt and moisture.
- **Wiper Mat** – The final mat in a 3 Mat System removes any remaining dust and moisture after using the Scraper and Scraper/Wiper mats.
- **Slip Resistant/Safety Mat** – Protects against slips and falls by creating safe working areas for employees and visitors.
- **Anti-Fatigue Mat** – Enhances worker productivity by providing support for legs and back, allowing your employees to feel comfortable and rested.
- **Anti-Static Mat** - Helps control electrostatic discharge to protect electronic components from damage and data loss.
- **Flow Through Mat** - A wet area solution that allows liquids to pass through to eliminate slip hazards and provide comfort when standing for long periods of time.
- **Restroom Mat** – Extends the life of your restroom floors by soaking up splashes and odors caused by urinal and commode use.
- **Custom Logo Mat** – A unique way to promote your company's image, logos or other designs can be replicated on the face of numerous styles of mats.
